## LGBTQ+ Health Program

*An LGBTQ+ Inclusive  
Environment*

401-519-1940

## Why LGBTQ+ Healthcare Matters

In order to overcome the many LGBTQ+ health disparities in our community, we have created this program to lower barriers to care and offer unique services not available at many clinics in Rhode Island.

## Our Mission

To foster an environment in which LGBTQ+ patients and staff feel safe, welcome, and cared for regardless of sexual orientation, gender identity or expression. We use an integrated primary care model to provide high quality, affirmative and cost-effective health care for LGBTQ+ people.

## Our Staff are Trained

The Tri-County Health Center staff receive training on diverse LGBTQ+ identities, terminology and health disparities. Our staff are trained to avoid assumptions and stereotypes and to communicate with patients in an inclusive way allowing us to provide an open environment and non-judgemental care.

---

*"There is a palpable energy here among our staff to create safe and welcoming spaces for our LGBTQ+ patients." - Dr. Giordano-Perez*

---

## Call Me By My Name

We want to know your preferred name and pronoun(s). Our clinic forms avoid gender-specific terms and allow patients to identify how they choose.

## We Collect Data

We ask all patients to complete a Sexual Orientation and Gender Identity (SOGI) form. This allows us to evaluate and measure the quality of care we provide.

## Gender Neutral Bathrooms

Our bathrooms are all-inclusive for people regardless of gender identity, gender expression or ability.

## Sexual Health

We take routine sexual health histories as part of comprehensive history gathering for all of our patients, covering a broad range of sexual health topics.

## Counseling/Mental Health

We use an integrated behavioral health model to provide trauma informed care and counseling for all patients.

*All Are Welcome Here.*
